INDUSTRIAL IOT  
SOLUTIONS

FANUC products are AI enabled.

# Consistency wherever you operate

**Centralised manufacturing in Japan  
with continuous unmanned production ensures:**

- Consistent product quality, reliability & continuous innovation
- Efficient & stable supply

Sales 20% in Japan, 80% in Global markets

# **Automation has a name, and we embody it.**

Our Japanese production facilities are among the world's most highly automated.

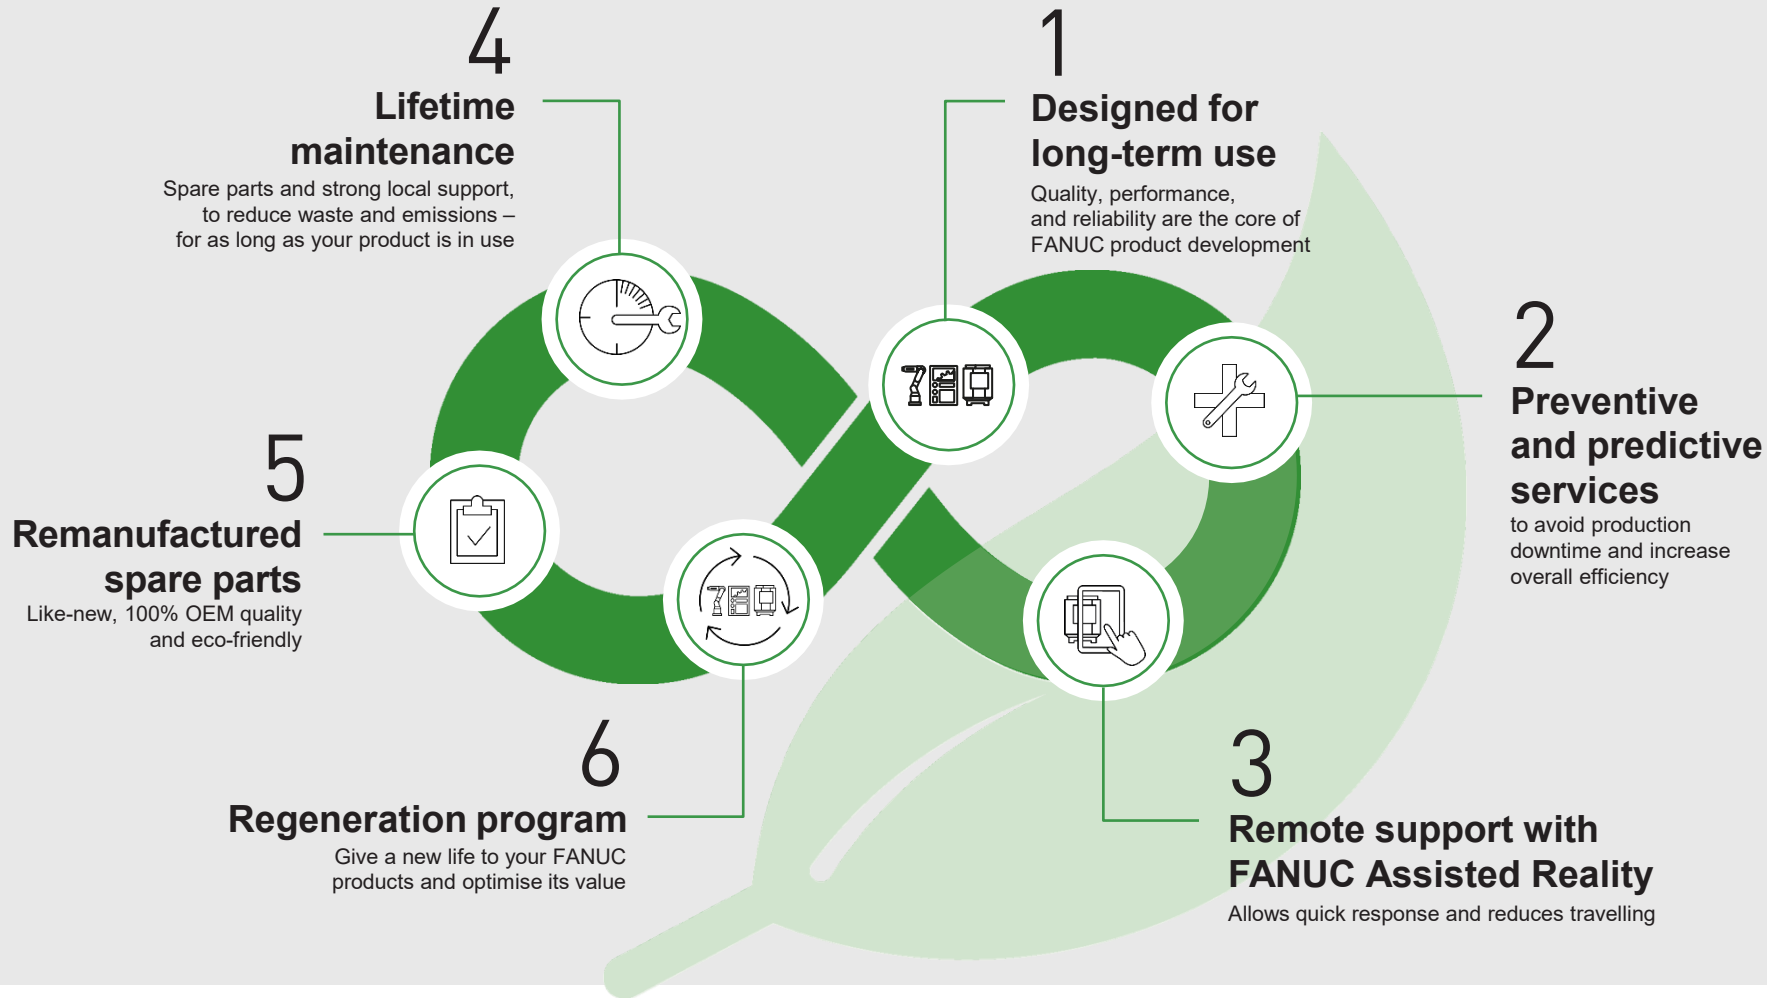

**We use  
automation  
ourselves**

# FANUC thinks green

We strive to preserve nature & resources for future generations  
by **reducing the environmental footprint at each stage of the product life cycle**,  
from product development to procurement, production and operation.

FANUC products are designed to be energy efficient  
helping lower the overall energy use of factories  
that rely on FANUC technologies.

1

### Designed for long-term use

Quality, performance, and reliability are the core of FANUC product development

2

### Preventive and predictive services

to avoid production downtime and increase overall efficiency

3

### Remote support with FANUC Assisted Reality

Allows quick response and reduces travelling

4

### Lifetime maintenance

Spare parts and strong local support, to reduce waste and emissions – for as long as your product is in use

6

### Regeneration program

Give a new life to your FANUC products and optimise its value

5

### Remanufactured spare parts

Like-new, 100% OEM quality and eco-friendly

**Strong presence  
in Europe**
